

REMARKS

In the Office Action of August 20, 2007 in the subject U.S. patent application, the Examiner noted various minor typographical errors in the Substitute Specification. These have been corrected. The Examiner's time, in reviewing the Substitute Specification, is appreciated.

The claims which were withdrawn from consideration, in accordance with the Response to the Restriction Requirement, which was filed on April 20, 2007, have now been cancelled. Applicant again reserves the right to file one or more divisional applications directed to these now cancelled claims.

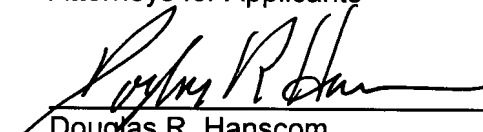

The Examiner's objections to claim 42 have been noted. In response, claim 42 has been amended to provide proper antecedent basis and to provide clarity of claim language. Minor changes have also been made to dependent claims 87, 98 and 100. These changes do not affect the scope of the claims.

It is believed that the subject application is now in condition for allowance. Such action and the forwarding of the application to issue is respectfully requested.

Respectfully submitted,

Reinhard Georg GROSS
Applicant
